

Lesson 4 Questions

How is <http://creativecommons.org> useful?

How is <http://www.morguefile.com> useful?

How is <http://www.w3schools.com> useful?

What does it mean if an html tag or element has been deprecated?

The <p> tag has one attribute listed on w3 schools. What is that attribute and should you use it?

Many of the attributes that are not supported in HTML5 relate to style (the appearance of the element). What will we be using instead of these html attributes to add style to our webpages?
