

Lesson 6 Questions

What is the advantage of naming the home page of a website "index.html"?

Why is it not a good idea to use the "name" attribute of the <a> tag?

Write a line of code gives the user a link called "Yahoo" that links to <http://www.yahoo.com>

In the <http://www.jacobenfield.com/csun/creations> url,

What does the **www.jacobenfield.com** represent?

What does the **csun** and **creations** represent?

What is the name of the file that is displayed when this url is entered?

Name three file types (other than .html files) that can be linked to from HTML.
