

Lesson 16 Questions

Write the HTML code that would generate the following **list**.

1. red
2. blue
3. green

What is the advantage of using the **word-spacing** css property over using non-breaking spaces () to space out text horizontally?

What is the advantage of using **lists** over using the **word-spacing** css property to space out text horizontally?

The following list is inside of a div with an id of "friends". Write the CSS needed to style the list so that the items are displayed horizontally with no bullets and spaced out with 50px between each one.

- Billy Bob
- Teresa
- Juan
