

## Lesson 29 Questions

Given the html code:

```
<span id="name">George</span>
```

What line of Javascript would be used to change the name "George" to "Debbie"?

What Javascript code would you use to generate a random number between 1 and 10?

```
var r =
```

How do you make an **initialize()** function run as soon as the html page loads?

What is the purpose of `\` in the following line of code?

```
var message = 'That\'s all folks.'
```

Explain the following line of code:

```
window.setTimeout("countDown()", 1000);
```
